IES (Industrial Exchange Specification) file format, and a file extension used with CAD programs that are used to specify industrial parts that can be specified in AutoCAD or other CAD programs . Standard features include drafting, automatic lay out, blueprinting, and technical support. Historical uses AutoCAD was originally designed for use in the printing industry and the packaging industry. It was ported to microcomputers in the early 1980s and has been used in all industries, as well as a variety of architectural and engineering specialties, including civil, interior, mechanical, aerospace, transportation, telecommunications, landscape architecture, photography, surveying and land development. As a result, AutoCAD has over 12 million registered users worldwide. The most notable feature of AutoCAD is its ability to connect through the World Wide Web. CAD data created in AutoCAD can be uploaded to any Web server and retrieved by web browsers. This capability has been used to produce CAD data in the construction of shopping malls and other large scale developments. AutoCAD is also a powerful data exchange and data acquisition tool. The software supports a number of industry-standard formats including Adobe PDF, Graphic Exchange Format (GTF) and Intergraph Building CAD (IBCAD).
