Induction of cytolytic activity by non-MHC restricted factors. A rabbit strain of lymphoma YR2-5 is more sensitive to cytolytic attack by F1 cytotoxic T lymphocytes (CTL) than its MHC-identical nonneoplastic counterpart, whereas the MHC-disparate 6-methylcholanthrene-induced lymphoma H12-1 is killed at equal rate by F1 CTL as by the YR2-5 CTL. The sensitivity of these tumour lines to lysis by YR2-5 CTL was found to be inhibited by trypsin and inhibited to the same extent in the presence of either anti-F1 CTL serum or a rabbit anti-rat immunoglobulin. These data demonstrate that non-MHC-restricted recognition of neoplastic cells can be sufficient to induce cytotoxic activity. Regarding the totally insane transformation of ObamaCare into a health care program, we suggest that you consider these changes as you shop for the perfect Christmas present. The IRS will now charge a penalty on patients for not having health care insurance. In other words, the IRS will ensure that your health care coverage will cost you money (for premiums and deductibles). It's OK for them to make you do that because you "can" opt out of it. The government will tell you that you have to pay up for your own good because "you" need to be protected. The U.S. will set up a plan to help the poor that will be over 100% of the poverty line and

families with less than \$100,000 will be allowed to qualify for Medicaid. So when you go to the hospital the government will pay 100% of your bill. We don't give a rats ass if you die or have thousands of dollars of medical bills. The president-elect is going to spend the next four years promising that ObamaCare will improve upon it. The Republicans aren't fighting
