Basic Accounting Practice Set Win Ballada Answer Key.rar

basic accounting practice set win ballada answer keyrar. compdfqbasic accounting practice set win ballada answer key 19 2016.Q: Custom Validation ASP.Net So I've come up with a little glitch in my code. I have a form with 4 fields that need to be validated, then the user clicks a button, and it goes to a new page. The fields need to be validated on that page too. I'm trying to use some validation controls, but they aren't working. I really need some guidance. Here's a snippet of what I have:

```
function validateForm() { var test1 = document.f.Name.value; if (test1 == "") { alert("Name is required"); return false; } return true; } function validate() { var test1 = document.f.Name.value; if (test1 == "") { alert("Name is required"); return false; } if (document.f.FirstName.value == "") { alert("First name is required"); return false; } if (document.f.SecondName.value == "") { alert("Second name is required"); return false; } if (document.f.ThirdName.value == "") { alert("Third name is required"); return false; } c6a93da74d
```
