We're happy to be able to include the ability to import the signature of any previous Reed200/WeirdAmbient sample via VST/AU/Standalone from the new Reed200 V2/Reed200 V2 STANDALONE sample. This way, we can keep the samples cross compatible. But this applies only to VST/AU formats. In addition to VST/AU standalone, we provide an iPad version of the sampler, as well as a Mac VST compatible version, for those with synths, etc.. To support the iPad version we need to add several additional tools and workflow improvements to our kit. Some of which we intend to provide in the next few months. We will also be contributing to the eu community via the sampleson community forums, so will be able to help you out there. Reed200 V2 is clean and responsive, because its timbre was made analyzing the real instrument model. Stacking up to 600 sine waves, we achieved a perfect and accurate timbre that reproduces the sound of a Reed-EP on the line output. Reed200 VSTi AU Standalone V1.0 MAC WiN

Reed200 V2 features a studio quality interface, but a totally transparent workflow thanks to the fact that you cant see the real Reed source. Now you can create your own virtual instruments and dont have to mess with the underlying data. Thanks to the low number of keys and simple controls and the convenient interface, Reed200 V2 is a great tool for all types of players. Each string has its own control and the reed sounds are operated with an intuitive MIDI controller. Reed200 has its own downloadable interface and Mac and Windows compatible.
